MISSION

We Believe Our Winning Concept Is to Combine
Cryptocurrency with Exciting and Money-making Worldwide Industries!

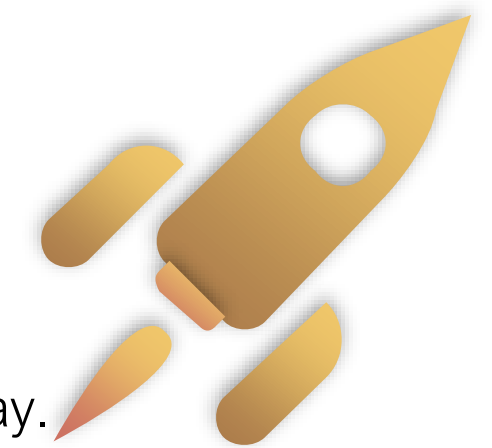

The Cryptocurrency industry has been around for a few years now. Despite some initial hesitation the currency is gaining ground every day. Since 2018, eXerGlobal has its own Cryptocurrency, **VIRIDI**. During spring same year, we started cultivations and sales of Cannabis in Switzerland

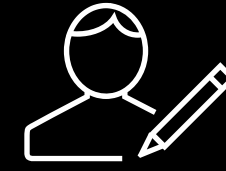

A year later in March 2019, Viridi was launched on the public Stock exchange.
Exer Gaming Studio set off a month after the same year and now produces both Casino and Smartphone games

eXerGlobal Is growing Fast, Stable And Controllable

Why Invest In Viridi?

VIRIDI is the first Coin in the world that combines investments in the Cryptocurrency market with investments in the Cannabis market. VIRIDI (VIC) has been tradeable on the exchange market since March 23rd, 2019.

Viridi was in the beginning focused on cryptocurrency trading that allowed investments in CBD cannabis plants. Now we also generate profit from Gaming, Game development, Sports betting and Real Estate.

Every one of these industries are lucrative businesses with a multibillion-dollar value worldwide. The foremost use of VIRIDI is to get access to investment opportunities, which enables investors to get a high return.

VSMS TECHNOLOGY

VSMS TOKEN

01

Users can mine VSMS by sending SMS messages, verified on the Solana blockchain via a dedicated mobile app.

02

This approach democratizes mining, enabling users, even in areas with limited internet access, to participate in the blockchain economy.

03

The project aims to foster financial inclusion through low-cost, accessible mining, supported by a sustainable token buyback system that keeps the mining wallet replenished for future users.

VSMS Token is a blockchain-based cryptocurrency built on the Solana blockchain, leveraging SMS technology for decentralized mining.

Most telecommunications providers worldwide offer free or "up to" a limited number of SMS messages per month, meaning that for many users, sending SMS to mine tokens may not incur any additional cost. This feature further lowers the barriers to entry, allowing more individuals to participate in the mining process without financial burden.

DOWNLOAD THE APP

ECONOMIC STRUCTURE

The VSMS Token (VSMS) ecosystem is built around a sustainable buyback system, allowing users to sell their tokens back to the platform.

Once sold, these tokens are reintroduced into the mining wallet, ensuring that they can be mined again by future users.

This creates a cyclical and self-sustaining flow of tokens within the ecosystem.
